

Select Solar

AEC Announces NEW Options for Renewable Energy

Because of the success of Co-op Community Solar, AEC is moving forward to offer a new option in renewable energy called “Select Solar”. This model allows residential and commercial members to participate in the support of renewable energy **and** receive a credit for their efforts. Participants in “Select Solar” will choose a \$10, \$20 or \$40 level called a “block”. The amount of each block will be added to the monthly electric bill. Members may choose as many blocks as desired. Each block will return a credit on the monthly electric bill based on the actual generation of solar. This is a win-win for both the member and the environment.

An estimated conservative example is below:

One \$10 block	Produces 200 kwh monthly	Costs \$10 monthly	Credit \$9 monthly
One \$20 block	Produces 400 kwh monthly	Costs \$20 monthly	Credit \$18 monthly
One \$40 block	Produces 800 kwh monthly	Costs \$40 monthly	Credit \$36 monthly

*Credits will vary month to month, based on actual solar generation. It can be expected that generation will be higher in the summer months and lower in the winter months.

- Participation in **Select Solar** requires a 12 month commitment. Thereafter, the agreement remains in place month-to-month until canceled by the member or the utility.
- If electric service is terminated, the **Select Solar** agreement is also terminated.
